Basic Concept of Professional Nursing	1801213	Theory professor
Nursing Care of Adult II	1801317	Theory professor
Emergency Nursing	1803431	Theory professor

### Brief Description of the Undergraduate Courses taught

1-	This course will explore the historical foundations, current issues and future direction of professional baccalaureate nursing practice within the context of the current health care system. It aims in addressing, professional role development integrating concepts of multidimensional care and skill of inquiry and analysis to inform clinical decision making, professional judgment and lifelong learning. This course presents the legal and ethical aspects of nursing, nursing education, the value of research and nursing theories,
2-	This course gives the student the knowledge which used in applying the critical thinking approach and decision making in the health care medical and surgical settings. Also, it helps in developing skills needed in nursing care based on nursing process approach. The course helps the students in identifying the actual and potential problems related to patients with Diabetes mellitus, urinary tract, immunology, integumentary, Sensorineural, neurologic and musculoskeletal disorders.
3-	This course focuses on the theoretical knowledge and care about emergency nursing which is an essential component of health care delivery system. This course is designed to give students the chance to gain in depth understanding of nature of emergency nursing and role of nurse in meeting different needs of patients in emergency situations. It provides the students with knowledge that will help them to provide efficient nursing care during emergency and disaster situations either in pre-hospital settings or in hospital setting and also in disasters. This course will include three main parts namely basics of emergency, first aid and emergency nursing care for trauma in the different body systems and nursing care for specific medical emergencies.
