Professional Summary:

Resourceful and dedicated M.Phil holder in microbiology with fifteen years of research and teaching-related experience. Having the ability to multi-task and work in a team, I possess strong interpersonal skills to teach, interact with, and understand people. With a keen interest in interactive teaching modes through contemporary learning technologies, I have been able to understand the learning needs of students and respond appropriately through one-to-one support or by directing them to further supports and guidance.

In my teaching responsibilities, I develop course materials, including lesson plans, assignments, quizzes, tests, course hand-outs, and presentation. Actively participate in program reviews, curriculum development and research activities.
